		4 Bedroom Beach House Average Square Footage:	3310	3643	3477

Note: The proposed HOA Fee Structure is based on all usable square footage for all units then divided into five areas or zones. The five areas or zones consist of the four condo building and the 20 beach front homes are considered to make up the 5th area or zone. The square footage is thus used to determine the percentage share of each area and the HOA fee responsibility is then divided among those unit within their own designated areas or zones. Average square footage is thus used where the difference in size and benefit are minimal to keep the fees consistent by unit category. The category for HOA fee consist of : 1 bedroom units, 2 bedrooms units, 3 bedroom units and Villas. The three bedroom units share similar average square footage as a one bedroom and two bedroom combined therefore it is proposed these units pay the amount totaling a 1 bedroom plus a 2 bedroom unit.
